Re: Technical corrections

Dear Mr. Rohan Jadhav,

thank you for your kind consideration/technical check of

Manuscript Title: Binary Quantum Random Number Generator Based on Value Indefinite
Observables

Manuscript ID: 2d9c0c51-61f0-4f94-b791-11c938162433 v1.0

I shall answer inline and directly to the issues raised::

1. Please number all tables sequentially, using whole numbers. E.g. 1, 2, 3 etc, rather than using roman numbers

There are *no* tables in the main manuscript. However we *refer to* papers which include roman table numberings, and there is very little we can do about these existing publications.

2. We notice that table 1-3 has been referenced in the main text of your manuscript file but this table has not been included with your submission. Please either include this table in your manuscript file in an editable Word or TeX/LaTeX format along with its legend or update the references to this table in the main text of your manuscript accordingly.

Same as above. All tables referred to occur elsewhere in published form.

3. Please number all figures sequentially, using whole numbers and alphabets for subfigures. for E.g. 1, 2, 3 etc, rather than (1a), (1b), (1c), etc. We noticed that one figure is referred as Fig. 24.2.a , Please correct this.

* Figures are now labeled with arabic numerals.

* Subfigures are quoted according your scheme.

* Please note that Fig. 24.2.a is an external figure of Ref. 30 It is now quoted as Figure (24.2.a); same for Figure (24.2.b).

4. Please provide "Data availability statement" on the submission system under "Data availability" in the Declaration section.

"Data availability" statements can take one of the following forms (or a combination of more than one if required for multiple datasets):

- The datasets generated and/or analysed during the current study are available in the [NAME] repository, [PERSISTENT WEB LINK TO DATASETS]*
- The datasets used and/or analysed during the current study available from the corresponding author on reasonable request.*
- All data generated or analysed during this study are included in this published article [and its supplementary information files].*
- The datasets generated and/or analysed during the current study are not publicly available due [REASON WHY DATA ARE NOT PUBLIC] but are available from the corresponding author on reasonable request.*
- The data that support the findings of this study are available from [third party name] but restrictions apply to the availability of these data, which were used under license for the current study, and so are not publicly available. Data are however available from the authors upon reasonable request and with permission of [third party name].*

Please note that if you do wish to share your raw data and do not have consent from all patients to publish this data, it will need to be de-identified.

Done.

Please note that I also used a "one column" style (was previously two columns), and updated some references.

Thank you for your kind efforts and attention!

With kind regards,
